Profile

Senior software engineering with over 6 years of experience in full-stack development, specializing in Machine learning, Python, Flutter, React JS, Node.js, and data structures/algorithms. Proven track record of delivering high-quality projects using technologies like Next.js, Django, and Node.js. Skilled in designing and developing scalable mobile and web applications, implementing efficient algorithms, and working with databases.

Education

Software Engineering BSc, Addis Ababa University (ranked 6th in Africa) 📄 09/2015 – 07/2019
Software Engineering student with a CGPA of (3.65/4.0). Graduated by 2019. Addis Ababa, Ethiopia

Introduction to Competitive Programming, Africa to Silicon Valley 📄 12/2021 – 12/2022
Learned data structure and algorithms at a company called A2SV backed by Google. A2SV upskills high-potential African students and connects with top Silicon Valley companies. Addis Ababa, Ethiopia

Professional Experience

Python developer, Turing 📄 10/2024 – 03/2026
At Turing, I worked closely with different top tech companies on enhancing the performance of their model. California
My primary responsibilities included identifying and rectifying over 500 model flaws, which significantly improved the model's accuracy and performance trajectory. I applied machine learning techniques and Python programming to optimize their model for complex tasks, contributing to innovative AI solutions.

Full-stack Developer, AAI Labs 📄 10/2020 – 09/2021
I worked as a senior developer on an audiobook synthesis project where I built a frontend using Next.js and Tailwind CSS as the framework. Additionally, I developed a RESTful API with Django to provide backend services for the model's functionalities. Addis Ababa, Ethiopia

Head of Education, Africa to Silicon Valley 📄 01/2023 – 01/2024
Working as Head of Education at A2SV and giving quality education on data structure and algorithms to 32 trainees.

Backend Developer, Kemer Habesha 📄 07/2022 – 03/2023
Working as a backend developer at Kemer Habesha, a team of tech enthusiasts and design geeks who give digital solutions to real-world problems. We built different apps like Alen, Taza, and Kemer Pos.

Mobile Developer, Africa to Silicon Valley 📄 08/2022 – 02/2023
Worked as a mobile developer using Flutter and as a deputy team leader for 5 fellow workers. Worked on the Rate Eat project which is a platform for reviewing restaurants, and food, and finding dining options.

Mobile Developer, Eskalate 📄 03/2023 – 11/2023
Worked as a mobile developer using Flutter at Eskalate and as a team leader for 6 fellow workers. Worked on impactful projects like Hakim-hub which is a platform for finding hospitals, and doctors, and receiving medical recommendations through a chatbot. This includes a sophisticated medical information recommendation system.

Full stack Developer, Merebe Technology 📄 10/2021 – 06/2022
I worked as a full stack developer for a year, using an agile workflow with a team of 10 members. We used Django and Node.js for the backend, and Next.js with TypeScript for the frontend. We delivered optimal solutions to various real-world problems. Addis Ababa, Ethiopia

Projects

RATE EAT 📄
RateEat is a comprehensive mobile application that empowers users to give and consume item-specific reviews while highlighting the growth points of businesses. The project utilizes a stack consisting of Node.js for the backend, MongoDB for the database, and flutter for the mobile app development. My main role was mobile developer with flutter.

Alen 📄
Is a home service app that connects different professionals with clients. We built a web and mobile app that has 1k+ downloads on Play Store. On this project, I was one of the three backend developers.

Real Estate App 📄
Revolutionizes property search and management with features like a chatting and booking system. Powered by Flutter for the mobile front end and Node.js with Express.js in TypeScript for the backend.

Pesa Mezani 📄
Pesa Mezani is a simple tool to organize your finances, plan your future budget, and participate in the local market. It offers a way to exchange value between users using in-app credits. My role was a Fullstack developer with MongoDB, Node.js, Realm DB, Firebase, and Flutter.

Skills

- Programming Languages
Python | Java | Typescript | JavaScript | C# | C++ | Dart
- Frameworks
Flutter | Node.js | Express.js | React | Spring boot | MongoDB | MySQL | Postgresql | Nest.js | Next.js.
